

24-Port Gigabit Ethernet Network Switch

This 24-Port Gigabit Ethernet Switch is designed for high-performance network connectivity. It provides 24 Gigabit Ethernet ports for fast data transfer and reliable network performance.

Overview

High-Performance Network Connectivity

The 24-Port Gigabit Ethernet Network Switch is a robust solution designed to support demanding network environments in small to medium-sized businesses. It provides 24 high-speed Gigabit Ethernet ports, ensuring rapid data transfer and reliable connectivity across your infrastructure. This scalable switch is engineered for stability and performance, making it an essential component for modern professional networking setups.

Technical Specifications

Total Gigabit Ports	24
Port Type	Gigabit Ethernet
Model Identifier	S1224G

Key Performance Metrics

Network Performance

24 Ports
Gigabit Ports

Features

Front Panel Indicators	Speed, Link/Act
