

24-Ton Topless Tower Crane

This topless tower crane is designed for demanding construction projects, offering a high-capacity lifting solution. The crane's robust structure and advanced control systems ensure exceptional performance and reliability.

Product Overview

High-Capacity Topless Tower Crane

The STT553-24t topless tower crane is a high-capacity lifting solution engineered for demanding construction environments. Its topless design optimizes operation in congested sites, effectively minimizing interference with other machinery. With modular construction and advanced safety protocols, this crane ensures reliable performance, simplified logistics, and enhanced security for personnel.

Technical Specifications

Maximum Lifting Capacity

24 ton

Max Capacity

Crane Design

Topless Design • Modular Construction

Operational Advantages

- High-capacity lifting
- Advanced control systems
- Easy assembly and disassembly
- Minimized transportation costs
- Enhanced safety features
