

240-270W Polycrystalline Solar Panel

This high-efficiency polycrystalline solar panel is designed for various applications. The panel features 60 cells of 6-inch poly material and offers a power output ranging from 240W to 270W.

Product Overview

High-Efficiency Solar Power

This polycrystalline solar panel is engineered for versatility and reliable energy generation in both grid-tied and off-grid configurations. Featuring 60 high-quality 6-inch cells, it delivers a robust power output range of 240W to 270W. Designed to meet the demands of residential, commercial, and industrial applications, this panel provides a sustainable energy solution backed by international quality standards.
