Product Overview

High-Performance Indoor Cultivation Lighting

This 240W full spectrum LED grow light is engineered for professional indoor plant cultivation, providing a uniform light distribution essential for healthy development. Its modular, dimmable design offers flexibility for various growth stages, from vegetative growth to flowering. Built with a durable aluminum frame, the unit ensures efficient heat dissipation while delivering significant energy savings compared to traditional HPS lighting systems.

Technical Specifications

Design Characteristics

- Full spectrum output
- Modular design
- Aluminum frame construction

Power Consumption	240 W
Energy Savings	40% less energy than traditional HPS
Dimmable	Yes

Compliance & Standards

Certifications

UL Certified
