

## 2.4GHz Wireless Surveillance Camera

This compact 2.4GHz wireless camera is designed for discreet surveillance and monitoring. It incorporates a flexible antenna for optimal signal reception and includes a wired interface for connectivity.

### Overview

#### Compact Wireless Surveillance Solution

This 2.4GHz wireless surveillance camera is designed for discreet monitoring applications where space is at a premium. Featuring a 1/3-inch CMOS sensor and a 62-degree field of view, it provides reliable visual coverage for various security setups. Its efficient design includes automatic gain control and an ISM frequency band, making it a straightforward choice for professional surveillance integration.

### Imaging Performance

Imaging Sensor	1/3" CMOS
Horizontal Resolution	380 TV lines
View Angle	62 degrees
Minimum Illumination	1.5 Lux
Gain Control	Automatic

### Transmission & Connectivity

Frequency Range	2,400MHz ~ 2,483MHz
Transmission Power	10 mW
Modulation Mode	FM
Bandwidth	18 MHz

### Technical Specifications

#### Supported Resolutions

**628 H**

PAL Pixels

**510 H**

NTSC Pixels

Consumption Current	80 mAh
Operating Humidity	85 % RH
