

24L Portable Oil-Lubricated Direct Drive Piston Air Compressor

This 24-liter air compressor is a portable unit with a direct-drive piston mechanism and oil lubrication. It is designed to provide compressed air for various pneumatic applications.

Product Overview

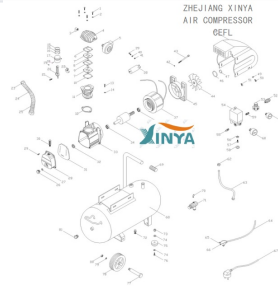

Compact 24-liter direct-drive air compressor

Professional Performance in a Portable Design

This 24-liter portable air compressor is engineered for professional durability and reliability across a range of pneumatic applications. Featuring an oil-lubricated direct-drive piston system and a robust cast iron cylinder, it ensures efficient operation and extended service life. The unit is designed for ease of use, incorporating thermal protection for the motor, precise pressure regulation, and convenient portability for workshops or job sites.

Technical Specifications

Detailed technical exploded view for maintenance

Motor Power

1.5 KW

Power

2 HP

Horsepower

Performance Metrics

Metric	Value
Max Air Flow	198 L/min (7cfm)
Max Pressure	8 bar (115 psi)
Speed	2850 r.p.m

Electrical Requirements

- Voltage: 127V / 230V / 220V
- Frequency: 50Hz

Model	CEFL24
Tank Capacity	24 L

Construction & Features

User Features

- Pressure switch with auto cut-in/cut-off
- Pressure regulator with integrated gauge
- Easy-open drain valve
- Carry handle for portability
- Quick connector available

Key Components

Oil-lubricated, Direct drive, Cast iron cylinder, Aluminum head, Thermal protection

Certifications

Compliance

CE • ISO 9001 • RoHS • GS
