

24mm Feeder for SMT Machines

This 24mm feeder is designed for SMT (Surface Mount Technology) machines. It ensures accurate and reliable component placement during the PCB assembly process.

Product Overview

Precision 24mm SMT Feeder Component

This high-precision 24mm feeder component is engineered for seamless integration into Surface Mount Technology (SMT) assembly lines. Designed to ensure reliable and accurate component placement, it plays a critical role in maintaining optimal efficiency during the PCB assembly process. Built with durable materials, this component is an essential replacement or upgrade part for industrial printing and placement machinery.
