

24V 10W Miniature Incandescent Bulb

This miniature bulb is designed for various automotive lighting applications. Its compact size and standard base make it suitable for use in instrument panels, indicator lights, and other low-voltage lighting systems.

Product Overview

Reliable Miniature Lighting Solution

This miniature incandescent bulb is engineered for consistent performance in demanding automotive and low-voltage applications. Featuring a clear glass envelope and robust filament construction, it ensures reliable illumination for critical systems. Its compact design and standard base make it an ideal choice for instrument panels and indicator lights where space is limited.

Technical Specifications

Performance Metrics

24 V

Voltage

10 W

Power

Operating Voltage	24 V
Power Rating	10 W

Applications

Common Applications

- Automotive lighting
- Instrument panels
- Indicator lights
- Low-voltage lighting systems

Design Features

Design Highlights	Clear glass envelope, Robust filament, Compact size, Standard base
