

24V 30A 3-Pole AC Contactor

This 24V 30A 3-pole contactor is designed for air conditioning applications. It is part of the HCDP series and suitable for HVAC&R systems requiring reliable switching of electrical circuits.

Product Overview

High-Performance 3-Pole AC Contactor

This 3-pole AC contactor is engineered for reliable switching in HVAC&R systems, meeting the rigorous ARI 780/790 standards. Designed for durability, it features a dust-free internal construction and a superior copper coil to ensure long electrical and mechanical life cycles. With a universal metal mounting plate, it offers flexible installation options and ease of replacement for various professional applications.

Electrical Specifications

Coil Voltage	24 VAC
Rated Current	30 A
Number of Poles	3
Coil Rating Range	24 to 600 VAC

Performance Metrics

Electrical Life Rating

250000 cycles
Tested Cycles

Mechanical Life Rating

1000000 cycles
Tested Cycles

Construction & Design

Mounting	Universal metal mounting plate
Design Features	Dust-free internal construction, Superior copper coil, EE magnet assembly

Compliance

Standards Met

ARI 780/790
