

24V DC Permanent Magnet Motor 2.5A

This is a permanent magnet DC motor ideal for general applications. It operates at 24V and has a rated speed of 2750 RPM with an operating current of 2.5A.

Overview

High-Performance DC Motor

The ZYT-80-02-3 permanent magnet DC motor is engineered for reliable performance in a variety of general-purpose industrial applications. Operating at a stable 24V, this unit delivers a consistent output speed of 2750 RPM, making it an ideal choice for precision-driven machinery. Its robust design ensures durability, providing a dependable solution for professional equipment integration.

Technical Specifications

Rated Voltage	24 V
Rated Speed	2750 RPM
Operating Current	2.5 A
Model Identifier	ZYT-80-02-3
Serial Number	20070817
