Overview

High-Performance Industrial Relay

This compact and robust power relay is engineered for demanding industrial environments, offering reliable switching performance for automation systems, control panels, and power distribution units. It operates at 24VDC and features an integrated LED indicator for immediate visual status confirmation, streamlining diagnostics and maintenance. Designed for versatility, this unit handles both AC and DC loads, ensuring dependable operation across various electrical applications.

Technical Specifications

Switching Capacity

10 A @ 250VAC
AC Load

10 A @ 30VDC
DC Load

Terminal Connections

- 5
- 6
- 7
- 9
- 10
- 11
- 12

Rated Coil Voltage

24VDC

Compliance & Features

Certifications

CE, cURus

Status Indicator

Yes
