Overview

Compact Power and Precision

This 2.5-2.6 ton compact wheel loader is engineered for high-performance material handling in confined environments. Featuring a robust, load-bearing frame and a powerful diesel engine, it delivers exceptional productivity in challenging conditions. The ergonomic cabin, combined with intuitive pilot joystick controls and a panoramic view, ensures operator comfort and safety throughout long shifts.

Performance Metrics

Operating Capacity

2.6 Ton

Max Capacity

Maneuverability

Small turning radius with flexible articulated design

Technical Specifications

Engine Type	Diesel
Control System	Pilot Joystick for steering and loader control
Attachment System	Yes

Operator Environment

Cabin Comfort & Visibility

- Vibration absorbing seat
- Panoramic floor-to-ceiling tinted glass
- Easy-access steps
- Rear-view camera with large color screen

Features

Key Highlights

Articulated Design, Quick Hitch System, Rear-view Camera, Ergonomic Controls, High Visibility
