

2.5 HP Single-Cylinder Gasoline Engine

This is a compact and efficient single-cylinder gasoline engine. The 2.5 HP engine is designed for various applications, featuring a durable construction and reliable power for small machinery, generators, and other equipment.

Overview

Compact Power Solution

The 2.5 HP single-cylinder gasoline engine is a compact and efficient power unit designed for a variety of small machinery and equipment applications. Featuring an overhead valve (OHV) design, it delivers optimal performance and fuel efficiency for demanding tasks. Built with durability in mind, this engine includes user-friendly features like an easy recoil start system and a low-oil shutdown mechanism for enhanced protection.

Technical Specifications

Rated Power

2.5 HP

Power Output

Displacement

67 cc

Engine Type

Single-cylinder, Overhead Valve (OHV)

Features

Starting System

Recoil Start

Safety Features

- Low-oil shutdown protection
