Overview

Compact Silent Power Solution

This 25 kVA silent diesel generator set is engineered for reliable, efficient power generation in diverse professional environments. Designed with a focus on noise reduction and compact dimensions, it allows for efficient logistics, accommodating up to 18 units in a single 20ft container. The unit features a robust, industrial-grade enclosure and an advanced control system for seamless operation.

Technical Specifications

Rated Output

25 kVA

Rated Capacity

20 kW

Alternator Output

Electrical Characteristics

Parameter	Value
Voltage	380V
Frequency	50Hz

Components & Control

Controller Model	DSE4620
Engine Type	Isuzu

Logistics

20GP Container Capacity	18 units
