Overview

Robust Lifting Performance

This 25-ton crawler crane is a versatile construction machinery solution designed for small and medium-sized projects. Built with a durable crawler chassis, it offers superior stability and maneuverability across uneven terrain. The unit features a telescopic boom extending over 30 meters, supported by a high-performance hydraulic system for precise control during heavy lifting operations.

Performance Specifications

Max Lifting Capacity

25 tons
Capacity

Boom Length

30 m

Certifications & Compliance

Certifications

CE, ISO 9001, SGS, CNAS

Design & Utility

Ideal Applications

- Construction sites
- Infrastructure projects
- Heavy equipment handling
- Small to medium-sized projects

Key Features

Telescopic Boom • High-performance Hydraulics • Ergonomic Cabin • Advanced Safety Systems

Chassis Type

Crawler
