Product Overview

High-Performance Electric Material Handling

The 2.5 Ton Electric Forklift is a versatile industrial solution engineered for efficient material handling in warehouses, factories, and distribution centers. Featuring an advanced AC system and CAN bus technology, it delivers precise control and reliable safety protections. Its ergonomic design, including HMI-optimized controls and mast drop cushioning, ensures operator comfort while maintaining high productivity levels.

Performance Metrics

Lifting Capacity

2.5 Tons

Capacity

Operational Highlights

- Powerful lifting and climbing performance
- Small turning radius for confined spaces
- Intelligent deceleration turning for stability
- AC system with CAN bus technology

Design & Ergonomics

Operator Comfort

HMI Control Handle, Left/Right Hand Operation, Mast Drop Cushioning, Adjustable Seating

Structural Build

Overhead guard and body welding monolithic structure for enhanced strength

Safety & Reliability

Safety Systems

Multiple Protection System • Intelligent Deceleration • Tipping Prevention • Seatbelt Equipped
