Overview

Compact Power and Precision

This 2.5-ton mini excavator is engineered for high performance in confined spaces, featuring a reduced-tail-swing design that enhances maneuverability on tight job sites. Powered by a reliable 3-cylinder diesel engine, it offers excellent fuel economy and durability without the need for complex aftertreatment systems. With an ergonomic pilot joystick control and an operator-focused cabin, this machine balances productivity with comfort for long working hours.

Engine & Performance

Emission Standards

EPA Final Tier 4

Engine Type

3-cylinder, 4-cycle, liquid cooled diesel

Hydraulic System

Key Hydraulic Components

- Nachai main pump
- Eaton rotary motor
- Nachai walking motor

Design & Maneuverability

Key Design Features

Reduced-tail-swing, Adjustable crawlers, Blade-equipped, ROPS/FOPS compliant

Operator Comfort

Cabin & Control Features

- Air-suspension seat
- Italian-made pilot joystick
- Wide entryways
- Optional enclosed cab with A/C

Maintenance

Maintenance Highlights

- 180-degree opening side door
- No aftertreatment devices required
- Maintenance-free steel arm
- High-quality flexible hydraulic cylinders

Attachments

Compatible Attachments

Bucket, Hammer, Plate compactor, Auger
