

250cc Air-Cooled Off-Road Motorcycle

This air-cooled off-road motorcycle is designed for both recreational riding and practical transportation. It features a 250cc engine, providing ample power and torque for various terrains.

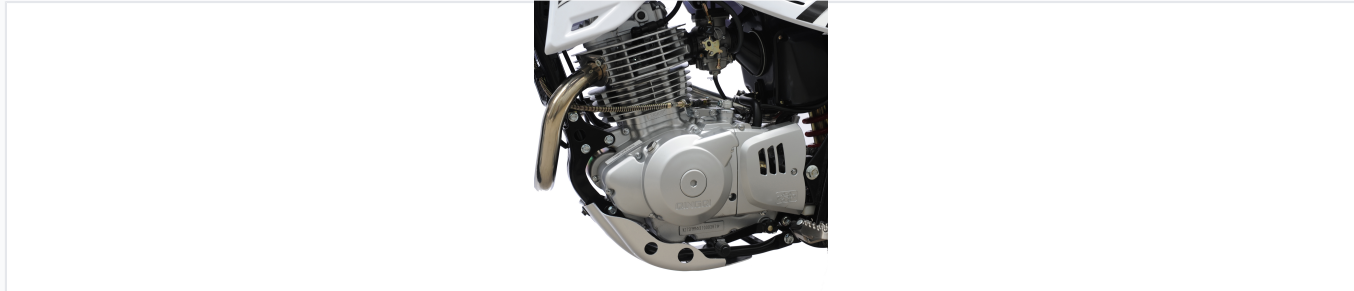

Overview

Versatile Off-Road Performance

This 250cc air-cooled motorcycle is engineered for both demanding off-road trails and practical utility. It features a robust, high-performance engine paired with a durable suspension system and wave-like disc brakes for superior control and safety. Designed with modern aesthetics, including LED lighting and a digital interface, this machine offers a perfect balance of reliability and modern rider comfort.

Technical Specs

High-performance air-cooled engine designed for efficient heat dissipation.

Engine Displacement	249 cm ³
Fuel Tank Capacity	10.6 L
Dry Mass	137 kg
Ground Clearance	245 mm
Seat Height	920 mm

Features

Integrated digital speedometer and analog tachometer for clear performance monitoring.

Front spoked wheel with hydraulic disc brake for enhanced stopping power.

Robust rear swingarm and ventilated disc brake assembly.

Braking System

- Front wave-like brake disc
- Rear wave-like brake disc
- Hydraulic disc brake calipers

Build Components

- Aluminum spoke wheels
- Rear swing arm
- Digital speedometer
- Protective skid plate

Lighting

LED Headlight, Diamond-shaped LED Indicators, LED Tail Lamp
