Overview

High-Performance Off-Road Motorcycle

This 250cc off-road motorcycle is engineered for demanding terrain, featuring a powerful water-cooled two-stroke engine and a fully automatic exhaust valve control system. Designed for agility and control, the bike includes front and rear adjustable suspension and a lightweight frame to handle challenging jumps and bumps. With its aggressive styling and robust construction, including a stainless steel exhaust and high-strength cast wheels, it is a reliable choice for competitive racing and off-road adventures.
