

250mL Electrical Enclosure Dehumidifier

This compact dehumidifier is designed for easy installation inside electrical cabinets. It quickly reduces internal humidity and drains condensate water outside of the enclosure.

Product Overview

Advanced Moisture Control for Electrical Enclosures

The DH3-60 series is a high-efficiency Peltier condenser designed to maintain safe humidity levels within critical electrical environments. By utilizing semiconductor technology, this refrigerant-free device actively prevents condensation and corrosion in switchgear, control cabinets, and outdoor terminal boxes. It serves as a modern, reliable replacement for traditional thermostat and heater/fan combinations, offering compact installation and remote monitoring capabilities.

Technical Specifications

Water Collection Capacity	250 mL
Cooling Technology	Peltier (Semiconductor)
Key Features	Refrigerant-free, Energy-saving, Compact Design, Remote Monitoring, Digital Display

Applications

Suitable Environments

- Switchgear cabinets
- Electrical control panels
- Outdoor terminal boxes
- Exchange control cabinets

Operational Controls

Control & Monitoring

1 Temp/Humidity

Real-time Display

1 Interface

Manual Control
