

250W Roller Scanner Stage Light

This roller scanner utilizes a 250W lamp to produce bright and vibrant beams of light. Its roller mechanism allows for precise and fluid movements, creating a variety of dynamic effects.

Overview

Professional Roller Scanner Lighting

The 250W Roller Scanner is a dynamic lighting fixture engineered for high-impact entertainment and stage environments. Featuring a powerful 250W lamp, it delivers vibrant, crisp beams ideal for clubs, theaters, and live event production. The precision roller mechanism ensures fluid, rapid movements for complex lighting effects, while the robust construction guarantees reliability during demanding performances.
