Overview

Versatile Agricultural Performance

This 254 Series agricultural wheel tractor is engineered for diverse farming environments, including dry fields, paddy fields, and greenhouse operations. Featuring a robust 25HP engine and a 4x4 drive system, it provides the reliability needed for plowing, tilling, and general maintenance. With options for both CAB and ROPS configurations, it balances operator comfort with the heavy-duty performance required for modern agricultural tasks.

Performance & Engine

Rated Engine Power

18.8 KW
Kilowatts

25 HP
Horsepower

Engine Configuration	3-cylinder, Water-cooled, In-line, Four-stroke
Max Traction Force	6.3 KN
Torque Reserve Coefficient	e25%

Drivetrain & Operation

Gear Shifts

8F+2R • 8F+8R Shuttle Shift

Drive System	4x4
Transmission Type	Sliding gear / Synchronizer
Clutch	8-inch double acting

Hydraulics & PTO

PTO Rotation Speeds

- 540
- 720
- 1000

Hydraulic Output Flow	25 L/min
-----------------------	----------

Max Lifting Force	5.2 KN
-------------------	--------

Dimensions & Weight

Physical Specifications

Metric	CAB Version	ROPS Version
Overall Dimensions (mm)	3453 x 1515 x 2450	3453 x 1515 x 2255
Min. Operating Weight (kg)	1550	1400
Standard Tires	6.0-16 / 9.5-24
