

25.4cc Diaphragm Carburetor Engine

This 25.4cc engine features a diaphragm carburetor. It has a 25:1 mixed fuel ratio and a standard power of 0.75/7500.

Product Overview

Compact Power Solution

The 1E34F series engine is a compact and lightweight power source designed for a variety of applications. Featuring a robust construction and efficient combustion, it delivers reliable performance for demanding operational environments. Its design emphasizes ease of maintenance and durability, incorporating features for optimal fuel consumption.

Technical Specifications

Model	1E34F
Discharging Capacity	25.4 cc
Carburetor Form	Diaphragm
Mixed Fuel Ratio	25:1

Performance Metrics

Standard Power

0.75 kW

Power Output

7500 RPM

Rated Speed

Physical Attributes

Net Weight	2.5 kg
