## Product Overview

### Professional Hedge Trimming Performance

The 25.4cc double-sided hedge trimmer is engineered for high-intensity, long-term use in professional landscaping environments. Featuring a thickened chrome-plated cylinder and a precision-engineered crankshaft, this tool offers exceptional durability and power. Its ergonomic 180° rotatable handle ensures comfortable operation at various angles, while the efficient engine design reduces fuel consumption by 30%.

## Engine & Performance

### Power Output

**0.75 kW**  
Power

**1 hp**  
Power

### Efficiency Features

- Digital speed-limiting magneto motor
- High-quality carburetor
- 30% reduced fuel consumption

Engine Displacement	25.4 cc
