

255W Polycrystalline Solar Module for Grid-Tie Systems

This solar module is designed for on-grid system project use. Featuring polycrystalline silicon cells, it provides reliable power output and long-term performance.

Overview

High-Efficiency Solar Solution

The 255W Polycrystalline Solar Module is engineered for reliable performance in residential and commercial grid-tie applications. Featuring robust construction with a durable aluminum frame and tempered glass, it is designed to withstand harsh weather conditions while ensuring efficient energy generation. This cost-effective module offers a straightforward installation process, making it an ideal choice for integrating into existing renewable energy systems.

Performance

Rated Power Output

255 W

Power Output

Technical Specifications

Cell Technology	Polycrystalline Silicon
Application	Grid-Tie, Residential, Commercial

Construction

Build Materials

- Durable Aluminum Frame
- Tempered Glass Cover

Benefits

Key Advantages

Sturdy Construction • Easy Installation • Cost Effective
