

25L Spherical Water Pressure Tank

This 25L ball pressure tank maintains consistent water pressure in residential and commercial water systems. The tank features durable steel construction with a corrosion-resistant coating and a standard threaded connection for easy installation.

Product Overview

High-Efficiency Spherical Pressure Tank

This 25L spherical water pressure tank is engineered to maintain consistent, reliable water pressure in both residential and commercial plumbing systems. Its unique spherical design maximizes structural strength while optimizing space, making it an ideal choice for compact installations. Built with durable steel and a corrosion-resistant coating, this tank ensures a long service life and dependable performance in various water pressure applications, including well pump and booster pump setups.

Technical Specifications

Capacity	25 L
Design Shape	Spherical
Material	Steel
Coating	Corrosion-resistant

Installation & Compatibility

Connection	Standard threaded connection
Compatible Systems	Well pumps, Booster pumps, Residential systems, Commercial systems

Key Features

Performance Benefits

- Prevents waterlogging
- Ensures efficient operation
- Maximizes structural strength
- Space-saving design

Internal Bladder	Yes
