

25mm Bevel Adapter for Construction Machinery

This 25mm bevel adapter is a specialized component for construction machinery. It provides a secure and reliable connection between parts, ensuring optimal performance and durability.

Product Overview

High-Performance Bevel Adapter

The 6Y3224 Bevel Adapter is a critical component engineered for robust performance in construction machinery, specifically designed for E307 excavators and similar heavy equipment. This 25mm adapter facilitates the secure and efficient attachment of ground-engaging tools, ensuring optimal load distribution and precise alignment. Constructed from high-strength materials, it is built to withstand harsh operating conditions, minimizing wear and maximizing the effectiveness of your machinery's digging and cutting capabilities.

Technical Specifications

Part Number	6Y3224
Bore Size	25 mm
Compatibility	E307
Secondary Identification	J220
Production Code	190301
