

# 25mm High Speed Steel Plate Drill Bit

This high-speed steel drill bit is designed for creating 25mm diameter holes in metal plates. Its robust construction ensures efficient and precise drilling for various metalworking tasks.

## Product Overview

### High-Performance Drilling Solution

This 25mm high-speed steel (HSS) plate drill bit is engineered for creating precise, clean holes in metal plates. Its robust construction minimizes material deformation and burrs, ensuring high-quality results for construction, manufacturing, and maintenance tasks. Designed for compatibility with standard drilling machines, this tool offers enhanced durability and an extended service life for professional metalworking applications.

## Technical Specifications

Drill Diameter	25 mm
Material Composition	High Speed Steel (HSS)
Suitable Applications	Construction, Manufacturing, Maintenance, Metalworking

## Performance Metrics

### Key Performance Benefits

- Clean and accurate hole creation
- Minimized burrs
- Reduced material deformation
- Enhanced durability
