

25MW Photovoltaic Power Plant Project

This is a 25MW photovoltaic power plant project. It demonstrates foreign engineering contracting in renewable energy.

Project Overview

25MW Photovoltaic Power Plant Project

This large-scale photovoltaic power plant project, located in Algeria, represents a significant investment in renewable energy infrastructure. With a total capacity of 25MW, the installation features extensive solar panel arrays optimized for desert environmental conditions. This project serves as a prime example of high-capacity foreign engineering contracting in the solar energy sector.

Total Capacity

25 MW

Installed Capacity

Project Location

Algeria

Project Type

Photovoltaic, Renewable Energy, Utility-Scale
