

25S Top Pin Tooth Bevel Adapter

The 25S top pin tooth and bevel adapter are essential components for construction machinery. These parts are engineered for robust performance and secure fitting in demanding construction environments.

Overview

Robust Construction Components

The 25S Top Pin Tooth and Bevel Adapter are engineered for demanding construction machinery applications. Designed for durability and consistent performance, these components feature a secure top-pin attachment system that streamlines maintenance and ensures reliable operation in harsh environments. Their robust construction provides effective material engagement and extended service life, helping to maintain high equipment productivity.

Technical Specifications

Application

Construction Machinery • Excavation

Maintenance Benefits

- Easy installation
- Simplified removal process
- Reduced downtime
- Secure and precise fitting

Model Series

25S

Key Features

Wear-resistant, Top Pin Design, High-quality Material, Stable Performance
