

26-inch Aluminum Alloy Mountain Bike

This mountain bike has a 26-inch frame made of high-strength aluminum alloy. It is equipped with a Shimano transmission system and a high-tensile steel damping fork.

Overview

Versatile Mountain Performance

This 26-inch mountain bike is engineered for both off-road adventures and recreational cycling. It features a robust aluminum alloy frame paired with a front suspension fork to effectively absorb bumps on uneven terrain. With reliable disc brakes and a multi-gear drivetrain, it offers consistent stopping power and efficient handling for riders of various skill levels.
