

# 26-Inch Electric Fat Tire Bicycle

This electric fat tire bike features a high-speed motor for enhanced power. Its large-capacity battery provides extended range for long rides.

## Overview

### All-Terrain Electric Performance

This 26-inch electric fat tire bicycle is engineered for versatile performance across various terrains. Built with a durable aluminum alloy frame and a robust brushless motor, it offers a reliable and powerful riding experience. Equipped with advanced features like a Samsung lithium-ion battery, front and rear disc brakes, and a precision Shimano derailleur system, this bike combines safety, comfort, and efficiency for professional and recreational use.

## Performance & Power

### Motor Power

**48 V**

Voltage

**1000 W**

Max Power

Maximum Speed	50 km/h
Range	40 km

## Technical Specifications

Frame Material	Aluminum alloy
Battery Capacity	48V 10-14Ah
Wheel Size	26 inches

## Components

### Control & Display

- LCD Display
- 48V Controller
- PAS Sensor

Braking System	Front Disc Brake, Rear Disc Brake
Derailleur System	Shimano 6/7 speeds
