

26-inch Full Suspension Mountain Bike

This full suspension mountain bicycle has a lightweight alloy frame. It is equipped with multi-speed gearing and a responsive braking system for versatile riding conditions.

Overview

Built for Adventure

This 26-inch full suspension mountain bike is engineered for recreational off-road cycling. Featuring a lightweight alloy frame, it incorporates both front and rear suspension systems to ensure superior shock absorption and handling on rugged terrain. The design prioritizes rider control and safety through a responsive braking system and versatile multi-speed gearing.
