

26-Inch Industrial Air Circulation Fan

This 26-inch industrial fan provides a high-performance ventilation solution for demanding environments. The fan features a robust metal frame, heavy-duty motor, adjustable height and tilt, and aerodynamically designed blades for maximum efficiency and minimal noise.

Product Overview

High-Performance Industrial Ventilation

The 26-inch industrial power fan is a high-performance ventilation solution designed for demanding environments like warehouses and workshops. Featuring a robust metal frame and a heavy-duty motor, this unit delivers powerful airflow for effective cooling and air circulation. Its durable construction, combined with aerodynamically designed blades, ensures long-lasting reliability and minimal noise during operation.

Technical Specifications

Available Sizes

- 500mm
- 650mm
- 750mm

Color Options

Black • Chrome

Model Number	FQL-26B
Materials	Iron, Aluminium

Logistics

Place of Origin	Guangdong, China
