

2632 Series Generating Set for Oil Drilling

The 2632 series generating set is designed for oil drilling applications, providing a reliable power source. It features a high-pressure common rail fuel system and dual electronic control for enhanced performance and reduced emissions.

Overview

High-Performance Power for Drilling

The 2632 Series Generating Set is specifically engineered to meet the rigorous demands of oil drilling operations. This robust power unit prioritizes reliability and efficiency, ensuring continuous and stable power delivery in challenging field environments. Equipped with advanced control systems and durable construction, it is an ideal solution for maintaining operational uptime in critical industrial applications.

Technical Specifications

Primary Application

Oil Drilling • Continuous Power • Industrial

Series

2632 Series

Performance Features

Core Performance

2632

Series Model

Key Features

- Advanced control systems
- Durable heavy-duty construction
- High-performance engine
- Engineered for demanding environments
