

# 27kV Outdoor Distribution Fuse Cutout

This outdoor expulsion drop-out type fuse cutout is designed for 27kV distribution systems. It protects power systems from overload and short-circuit failures.

## Product Overview

### Reliable Overcurrent Protection

This outdoor expulsion drop-out type distribution fuse cutout is engineered for 27kV electrical systems, providing essential protection against over-load and short-circuit failures. Designed for durability and performance, it features high mechanical strength and robust industrial frequency withstand voltage capabilities. It serves as a critical component in ensuring the stability and safety of power distribution networks.

## Electrical Ratings

### Rated Current

### Rated Voltage

27 kV

## Compliance & Standards

### Standards

IEC 600282-2

## Logistics & Shipping

### Shipping Methods

- Sea freight
- Air freight
- Express delivery

### Standard Delivery Time

35 days

### Packaging Details

1 piece per carton with foam lining, palletized. Custom packaging available upon request.
