

28000 lbs Vehicle Recovery Rope

This recovery rope has 30% elasticity for optimal performance. It is lighter and stronger than steel rope.

Product Overview

Professional Vehicle Recovery Rope

This high-strength recovery rope is engineered for demanding vehicle recovery and towing applications. Featuring a significant 30% elongation capability, it offers superior energy absorption compared to standard nylon snatch straps. Designed for resilience, it provides reliable performance for off-road enthusiasts and professional recovery services alike.
