

2800W Electric Garden Shredder

This electric garden shredder features a powerful 2800W motor. It is designed for shredding branches and garden waste to produce mulch or compost, and includes a large collection box and wheels for easy transport.

Overview

High-Efficiency Garden Shredder

This 2800W electric garden shredder is designed for efficient garden waste management, featuring a robust steel blade system capable of handling branches up to 44mm in diameter. It incorporates advanced safety features, including auto overload and restart protection, ensuring reliable operation. With its lightweight design, integrated wheels, and a generous 55L collection box, this unit offers both power and convenience for mulching and composting tasks.
