

280W Polycrystalline Solar Panel

This is a 280W polycrystalline solar panel. It is designed for renewable energy power generation.

Product Overview

High-Efficiency Polycrystalline Solution

This 280W polycrystalline solar panel is designed for robust performance in professional solar energy systems. It features reliable polycrystalline cell technology, offering an optimal balance between energy conversion efficiency and cost-effectiveness for various industrial and commercial applications. The panel is engineered to provide consistent power output while maintaining durability under diverse environmental conditions.

Electrical Performance

Rated Power Output

280 W

Maximum Power

Technology

Polycrystalline Silicon

Compliance and Standards

Global Certifications

CE, ISO 9001
