

2.8L Electric Hot Air Fryer

This electric air fryer utilizes a 360° hot air circulation system for efficient cooking. It offers frying with significantly reduced oil, a timer up to 60 minutes with auto shut-off, and a hydraulic thermostat for temperature control up to 200 .

Overview

Efficient & Healthy Cooking Solution

This 2.8L electric hot air fryer utilizes advanced 360° hot air circulation technology to provide a healthier alternative to traditional frying. It allows for cooking with little to no oil, reducing fat intake by up to 80% while maintaining crisp textures. Designed for convenience and safety, it features intuitive mechanical controls, a 60-minute timer, and cool-touch housing for a professional kitchen experience.

Technical Specifications

Performance Metrics

1200 W

Power Rating

200

Max Temperature

Electrical Requirements

Parameter	Value
Voltage	120V-240V
Frequency	50-60Hz

Cooking Capacity	2.8 L
