Overview

High-Performance Sport Motorcycle

This 292.4cc sport motorcycle is engineered for both track-day agility and daily street riding comfort. Featuring a liquid-cooled, single-cylinder DOHC engine, it delivers a responsive and exhilarating ride with optimized combustion efficiency. The aggressive, aerodynamic design is complemented by advanced technology including ABS braking, a full-color TFT display, and all-LED lighting.

Engine & Performance

Max Power

29.1 PS
Power

8750 rpm
at RPM

Max Torque

25.3 Nm
Torque

7250 rpm
at RPM

Displacement

292.4 cc

Engine Technologies

Liquid-cooled, DOHC, Electronic Fuel Injection, Balance Shaft, Dual-Coated Piston

Chassis & Handling

Suspension

- 37mm USD front fork
- Single-shock rear suspension

Braking System

Position	Component	Size
Front	Opposite 4-piston caliper	292mm disc
Rear	Single-piston floating caliper	220mm disc

Safety Systems

Intelligent ABS • High-performance radial tires

Electronics & Display

Display	Full-color TFT display with auto-adjusting brightness
Lighting	Full LED headlight and lighting system

Available Modifications

Factory CNC Kits

- Brake & Clutch Lever Guard Kit
- Adjustable Clutch & Brake Lever Kit
- High-grade Aluminum Footpegs
- Keyless Fuel Tank Quick Lock
- Upper Connecting Board Screw Kit
