

29er Carbon Fiber Mountain Bike

This 29er mountain bike is designed for cross-country riding and trail adventures. Its lightweight carbon fiber frame provides stiffness and responsiveness.

Overview

High-Performance Cross-Country Machine

This 29er mountain bike is engineered for competitive cross-country racing and demanding trail adventures. Built with a lightweight carbon fiber frame, it offers exceptional stiffness and responsiveness for riders who prioritize speed and agility. Equipped with high-quality components and a versatile drivetrain, this bike is designed to tackle diverse terrains with ease and precision.

Frame & Suspension

Frame Material	Carbon Fiber
Suspension	Front suspension fork with lockout

Drivetrain & Braking

Drivetrain	2x10
Brake System	Hydraulic disc brakes

Wheels & Tires

Wheel Size	29 inch
Tire Model	Continental X-King

Performance Metrics

Key Performance Features	Carbon Fiber Frame, Lockout Fork, Hydraulic Braking, 29-inch Wheels, Cross-Country Optimized
