

3-10T Rough Terrain Forklift

This rough terrain forklift is adaptable to various surface conditions. It is suitable for operation on soft soils, grass, terrain, and mine sites.

Overview

Rugged Performance for Demanding Environments

This rough terrain forklift series is engineered for superior stability and maneuverability on uneven surfaces. Built to withstand the rigors of construction sites and agricultural operations, it provides reliable lifting performance with a robust chassis. Operators benefit from enhanced safety features and powerful engine configurations designed for heavy-duty outdoor applications.

Technical Specifications

Lifting Capacity Range

3 T

Minimum Capacity

10 T

Maximum Capacity

Model Variant

CPCY50

Operational Features

Suitable Applications

Construction Sites, Agricultural Settings, Uneven Terrain, Outdoor Industrial

Design and Safety

Core Design Benefits

- Robust frame construction
- High-performance engine system
- Specialized rough-terrain tires
- Enhanced operator safety systems
