

3-5T Mini Rubber Track Crawler Dumper

This mini crawler dumper is designed for all-terrain transportation, featuring a rubber track system for enhanced stability. With a load capacity of 3 to 5 tons, it is suitable for agricultural and construction applications.

ADDITIONAL IMAGES

Overview

Designed for heavy-duty material transport in agricultural and construction settings.

All-Terrain Mini Crawler Dumper

This 3 to 5-ton mini crawler dumper is a versatile all-terrain transporter designed for demanding agricultural and construction environments. Featuring a robust rubber track system, it provides superior traction and stability on mud, icy roads, and uneven wet ground. Its compact design and high climbing ability make it an ideal solution for material handling in confined spaces and challenging landscapes.

Performance Metrics

The hydraulic dumping system facilitates quick and efficient material unloading.

Key Performance Metrics

5 T

Max Load Capacity

45 °

Climbing Angle

Technical Specifications

The robust rubber track system ensures stability on various surfaces including mud and sand.

Load Capacity Range	3 - 5 Tons
Engine Type	Chinese high-top qualified diesel engine
Transmission	Multi-speed heavy-duty (3 forward + 1 reverse)
Drive System	Rubber track crawler

Capabilities & Features

High ground clearance and crawler tracks allow for operation in challenging environments.

Built for durability and reliability in demanding industrial environments.

Key Features

- Hydraulic lifting mechanism for efficient unloading
- Self-propelled small dump design
- Customizable size based on demand
- Simple operator interface
- Easy maintenance access

Terrain Suitability

Mud, Ice, Sand, Wet Ground, Uneven Terrain

Applications

Ideal for transporting soil, gravel, and crops in narrow or confined spaces.

Primary Applications

Agriculture • Construction • Landscaping • Palm Oil Fruit Harvesting
