

3-6T Side-Loading Forklift

This side-loading forklift efficiently moves long, bulky loads in narrow aisles. With a 3-6 ton capacity, it suits industrial applications like handling pipes, lumber, and steel.

Overview

3-6T Side-Loading Forklift Overview

The 3-6T Side-Loader Forklift Truck is specialized material handling equipment engineered for the efficient transport of long and bulky loads in narrow aisles. Its unique side-loading capability allows for the safe handling of items like pipes, lumber, and steel by transporting them parallel to the direction of travel. Designed for warehouses and manufacturing facilities where space is at a premium, this truck combines a robust mast system with a powerful engine for precise, stable lifting.

Technical Specifications

Load Capacity

6 T

Maximum Load Capacity

3 T

Minimum Load Capacity

Suitable Applications

Pipes, Lumber, Steel, Long Loads, Bulky Materials

Operational Features

Key Operational Features

- Side-loading capability
- Narrow aisle operation
- Robust mast and fork assembly
- High-performance hydraulic system
- Precise operator control interface

Model Identifier

CCCD6
