

3 HP Direct-Coupled Air Compressor

This direct-coupled air compressor is designed for various pneumatic applications. It features a horizontally-oriented tank, wheels for portability, and safety features such as pressure gauges and relief valves.

Overview

Professional Performance

This direct-coupled air compressor is engineered for versatility and efficiency in pneumatic applications. Featuring a robust 3 HP motor, it is designed to handle tasks ranging from tire inflation to powering pneumatic tools and spray guns. Its portable design, complete with wheels and a handle, ensures easy maneuverability across job sites.

Technical Specifications

Motor Power	3 HP
Drive Type	Direct-Coupled
Model Identifier	LL50

Features

Safety Features

- Pressure Gauges
- Relief Valves

Portability	Wheeled, Handle Included
-------------	--------------------------

Applications

Common Applications

Tire Inflation • Pneumatic Tools • Spray Painting
