

3-in-1 Automatic Wine Bottle Filling Machine

This 3-in-1 monoblock machine integrates rinsing, filling, and capping functions for glass wine bottles. It ensures a seamless and efficient bottling process while maintaining product integrity.

Overview

High-Efficiency Monoblock Filling Solution

This 3-in-1 automatic wine bottle filling machine integrates rinsing, filling, and rotary capping functions into a single, high-efficiency unit. Designed specifically for the beverage industry, it utilizes advanced programmable control and magnetic coupling technology to ensure precise filling volumes and secure capping. Constructed with food-grade stainless steel and heat-resistant components, this machine meets strict sanitation standards while offering flexible, adjustable operation for various production needs.

Technical Specifications

Integrated Functions	Rinsing, Filling, Rotary Capping
Filling Principle	Equal pressure filling
Control System	Programmable logic controller (PLC)
Speed Regulation	Transducer-based variable frequency drive

Construction & Hygiene

Material Composition

- Stainless steel (contact parts)
- Food-grade harmless materials
- Heat-proofing rubber (sealing parts)

Compliance Badges

ISO • CE • UL • COC

Sterilization	Yes
