

3-in-1 Bottle Washing, Filling, and Capping Machine

This 3-in-1 high speed filling machine is suitable for large-scale beverage production. The machine integrates washing, filling and capping functions with a maximum output up to 36000 bottles per hour.

Product Overview

High-Efficiency 3-in-1 Bottling Solution

The RY-80-80-20 is a high-speed, integrated system designed to streamline large-scale beverage production by combining washing, filling, and capping into a single continuous process. Featuring a rotary design and precision-controlled filling valves, this machine ensures consistent liquid levels and meets rigorous food sanitation standards. It is constructed from durable stainless steel, offering an easy-to-clean environment that helps manufacturers reduce labor costs while maximizing output efficiency.

Performance

Maximum Throughput

36000 bottles/h

Output Capacity

Station Functions

Washing, Filling, Capping

Technical Specifications

Cleaning Standards

- CIP (Clean-in-Place) circulation loop
- Food sanitation standard compliant
- Rinsing circumfluence pipe

Material

Stainless Steel

Control and Safety

Key Features

Precision liquid level control • Rotary design • Adjustable settings • Continuous operation

Operator Interface

Touch screen control panel
