

3-in-1 Rinsing, Filling, and Capping Machine

This 3-in-1 machine integrates rinsing, filling, and capping processes for efficient water bottling. Designed for high-speed production lines, it ensures precision and hygiene in beverage manufacturing.

Overview

Integrated Bottling Solution

This 3-in-1 unit seamlessly integrates rinsing, filling, and capping processes into a single, efficient system designed for high-speed water bottling lines. By combining these essential operations, the machine optimizes floor space and minimizes manual handling of containers. Built with durable stainless steel components, it ensures hygiene and long-term reliability in demanding beverage manufacturing environments.

Technical Specifications

Model Number	CGF40-40-12
Machine Type	3-in-1 Monoblock (Rinser, Filler, Capper)
Construction Material	Stainless Steel

Key Features

Core Functions

- Bottle Rinsing
- Precision Filling
- Secure Capping

Performance Benefits

High-Speed Operation • Space Optimized • Hygienic Design • Leak Prevention
