

## 3-in-1 Sheet Metal Fabrication Machine

This versatile metalworking machine combines the functions of a sheet metal roller, a bending brake, and a shear. It is designed for fabrication shops, automotive workshops, and educational institutions.

### Overview

#### Versatile Fabrication Solution

The 3-in-1 Sheet Metal Fabrication Machine is a comprehensive metalworking station designed for fabrication shops, automotive workshops, and educational institutions. This compact unit seamlessly combines the functions of a sheet metal roller, a bending brake, and a shear, providing a versatile solution for various metal forming tasks. Its robust construction ensures the stability and accuracy required for professional-grade fabrication.

### Technical Specifications

Maximum Material Width	1320 mm
Maximum Material Thickness	1.5 mm

### Capabilities

#### Suitable Applications

- Fabrication Shops
- Automotive Workshops
- Educational Institutions

Integrated Functions	Sheet Metal Rolling, Bending Brake, Shearing
